Instructions to Authors

Manuscripts can be written in L^AT_EX using this template (www.ijbh.org/latex/). Manuscripts of original articles should follow all instructions described in the L^AT_EX template. Manuscripts using mathematical formulas should be written in L^AT_EX. The other possibility is to write manuscript in Word (www.ijbh.org/word/).

Manuscript Preparation

Authors are kindly requested to carefully follow all instructions on how to write a manuscript. In cases where the instructions are not followed, the manuscript will be returned immediately with a request for changes, and the editorial review process will only start when the manuscript has been resubmitted in the correct style.

Authors are responsible for obtaining permission to reproduce any copyrighted material and this permission should be acknowledged in the article.

Authors should not use the names of patients. Patients should not be recognizable from photographs unless their written permission has first been obtained. This permission should be acknowledged in the article.

Kindly send the final and checked source and PDF files of your article to the secretary andrlova@euromise.cz with the copy to editor in chef zvarova@euromise.cz. You should make sure that the L^AT_EX and the PDF files are identical and correct and that only one version of your article is sent. Please note that we do not need the printed article.

Where appropriate, the article should be organised into the following sections: *Abstract, Introduction, Objectives, Methods, Results, Discussion, Conclusions, Acknowledgments and References*. Apart from the main headings, subheadings should be used and may be numbered.

Authors are strongly encouraged to use L^AT_EX 2_ε for the preparation of manuscript.

If you use L^AT_EX together with our template file, your text is typeset automatically. Please do *not* change the present fonts. Do not use your own macros, or styles.

Please use the commands `\label` and `\ref` for cross-references and the commands `\bibitem` and `\cite` for references to the bibliography, to enable us to create hyperlinks at these places.

Title page

The first page of the article should contain: title of the article (also the shorter version for running heads), initials and last name of each author, to be followed with their institutional affiliations, the name, address, e-mail address and telephone of the corresponding author.

Abstract and Keywords

The abstract should summarize the contents of the article and should not exceed 250 words. Authors of original articles are requested to write a structured summary, adhering to the following headings: Background (optional), Objectives, Methods, Results, Conclusions.

At the end of the Abstract, the contents of the article should be specified by, at most, five keywords. We recommend using MeSH keywords.

Headings

Headings should be capitalized (i.e. nouns, verbs, and all other words except articles, prepositions, and conjunctions should be set with an initial capital) and should be aligned to the left. Words joined by a hyphen are subject to a special rule. If the first word can stand alone, the second word should be capitalized.

Figures and Tables

Attach figures and tables as separate files. Do not integrate them into the text. Do not save your table as an image file or insert a table into your manuscript text docu-

ment as an image. Figures and tables should be referenced in the manuscript by their numbers.

Annotations belong in a (self-)explanatory legend, do not use headings in the figure, explain abbreviations in the legend. Label all axes. Use a uniform type size (we recommend Arial 10 point), and avoid borders around tables and figures.

Submit graphics as a sharp printout as well as a file. The printout and the file must be identical. Submit the image file with clear labelling (e.g. Fig_1 instead of joint_ap).

Image resolution is the number of dots per width of 1 inch, the "dots per inch" (dpi). Printing images require a resolution of 800 dpi for graphics and 300 dpi for photographs.

Vector graphics have no resolution problems. Some programs produce images not with a limited number of dots but as a vector graphic. Vectorisation eliminates the problem of resolution. However, if halftone images ("photos") are copied into such a program, these images retain their low resolution.

If screenshots are necessary, please make sure that you are happy with the print quality before you send the files.

In the printed volumes, illustrations are generally black and white (halftones), and only in exceptional cases, and if the author is prepared to cover the extra cost for colour reproduction, are coloured pictures accepted. Coloured pictures are welcome in the electronic version free of charge. If you send coloured figures that are to be printed in black and white, please make sure that they really are legible in black and white. Some colours as well as the contrast of converted colours show up very poorly when printed in black and white.

Formulas

Displayed equations or formulas are centred and set on a separate line (with an extra line or halfline space above and below). Displayed expressions should be numbered for reference. The numbers should be consecutive within each section or within the contribution, with numbers enclosed in parentheses and set on the right margin.

Footnotes

The superscript numeral used to refer to a footnote appears in the text either directly after the word to be discussed or – in relation to a phrase or a sentence – following the punctuation sign (comma, semicolon, or period). Footnotes should appear at the bottom of the normal text area, with a line of about 2 cm set immediately above them.¹

¹The footnote numeral is set flush left and the text follows with the usual word spacing.

Program Code

Program listings or program commands in the text are normally set in a typewriter font, e.g. CMTT10 or Courier.

Acknowledgements

Scientific advice, technical assistance, and credit for financial support and materials may be grouped in a section headed 'Acknowledgements' that will appear at the end of the text (immediately after the Conclusions section). The heading should be treated as a subsection heading and should not be assigned a number.

References

The list of references is headed "References" and is not assigned a number. The list should be set in small print and placed at the end of your contribution, in front of the appendix, if one exists. Please do not insert a page-break before the list of references if the page is not completely filled. For citations in the text please use square brackets. In the text number the references consecutively in the order in which they first appear. Use the style, which is based on the formats used by the US National Library of Medicine in MEDLINE (sometimes called the "Vancouver style"). For details see the guidelines from the International Committee of Medical Journal Editors (www.nlm.nih.gov/bsd/uniform_requirements.html).

Checking the PDF File

Kindly assure that the Contact Volume Editor is given the name and email address of the corresponding author for your article. The corresponding author is asked to check through the final PDF files to make sure that no errors have crept in during the transfer or preparation of the files. Only errors introduced during the preparation of the files will be corrected.

If we do not receive a reply from a particular contact author, within the timeframe given, then it is presumed that the author has found no errors in the article.
